Taking Brands on Their Digital Journey

DENOVA TECHNOLOGIES

Taking Brands on Their Digital Journey

Cutplan and Roll Management

USER FRIENDLY

Prompt based, user friendly system. Easy to use GUI which reduces training time.

COMPLETELY INTEGRATED AND AUTOMATED

Completely integrated PDS, Cutplan, Roll Management and Autonesting.

Customer has the choice to run Cutplan with or without Nesting.

END LOSS MANAGEMENT

Save millions of dollars by better managing end bits in the cutting room. The software gives you a clear understanding of how much fabric will be left at the end of every roll. Improving your End bit Management and reducing wastage.

BUY LESS

A powerful costing tool , enabling customers to buy less fabric and reduce wastage in planning / costing stage.

INTEGRATION AND MARKET CHOICE

The choice of the biggest brands and manufacturers worldwide.

Completely integrateable with ERP, CRM and PLM systems.

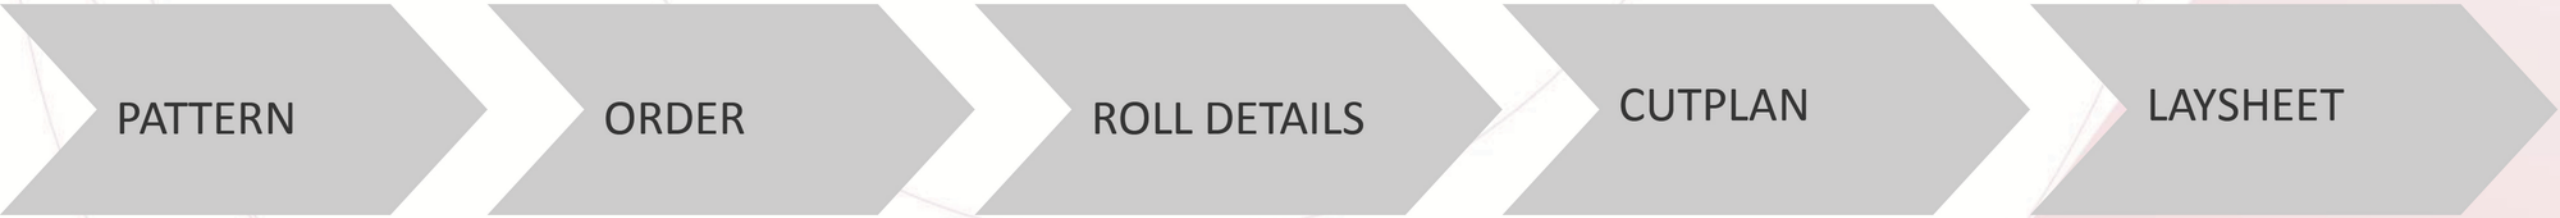

DENOVA TECHNOLOGIES

OPTITEX CUTPLAN

WorkFlow

PO (ORDER) need to Import from Excel or from PLM or ERP, Deviation can add according to requirements, Colour way order are size wise order can input

CUTPLAN reads the perimeter of Sizes, & Calculate the order, generate the Ratio Marker.

OPTITEX (PDS) Patterns is mandatory for the Cut plan, It helps to ready the perimeter of each sizes and ratio will suggest accordingly

Fabric Rolls can import thru EXCEL the variation of width Shrinkage & shades will slip as per order

As per Ratio marker & Roll, Cut plan Allocate the right Roll in Right Marker which minimize the end loss, ie non usable end bits

CUTPLAN - Maximize resource utilization and save production time and costs with optimized cut plans

- Optimize each order by calculating the minimal required number of tables
- Integrate different styles, sizes, colors, and fabrics in a single cut plan
- Generate detailed spreading information for multi-colored orders
- Accurately project and calculate order production costs
- Streamline workflows with end to end visibility of cutting room operation

CUTPLAN SUMMARY REPORT

Total Efficiency	82.41	%
Total Cost		$
Total cut length	488.35	m
Total Tables	7	
Average Length	0.82	m
Total Tables	7	

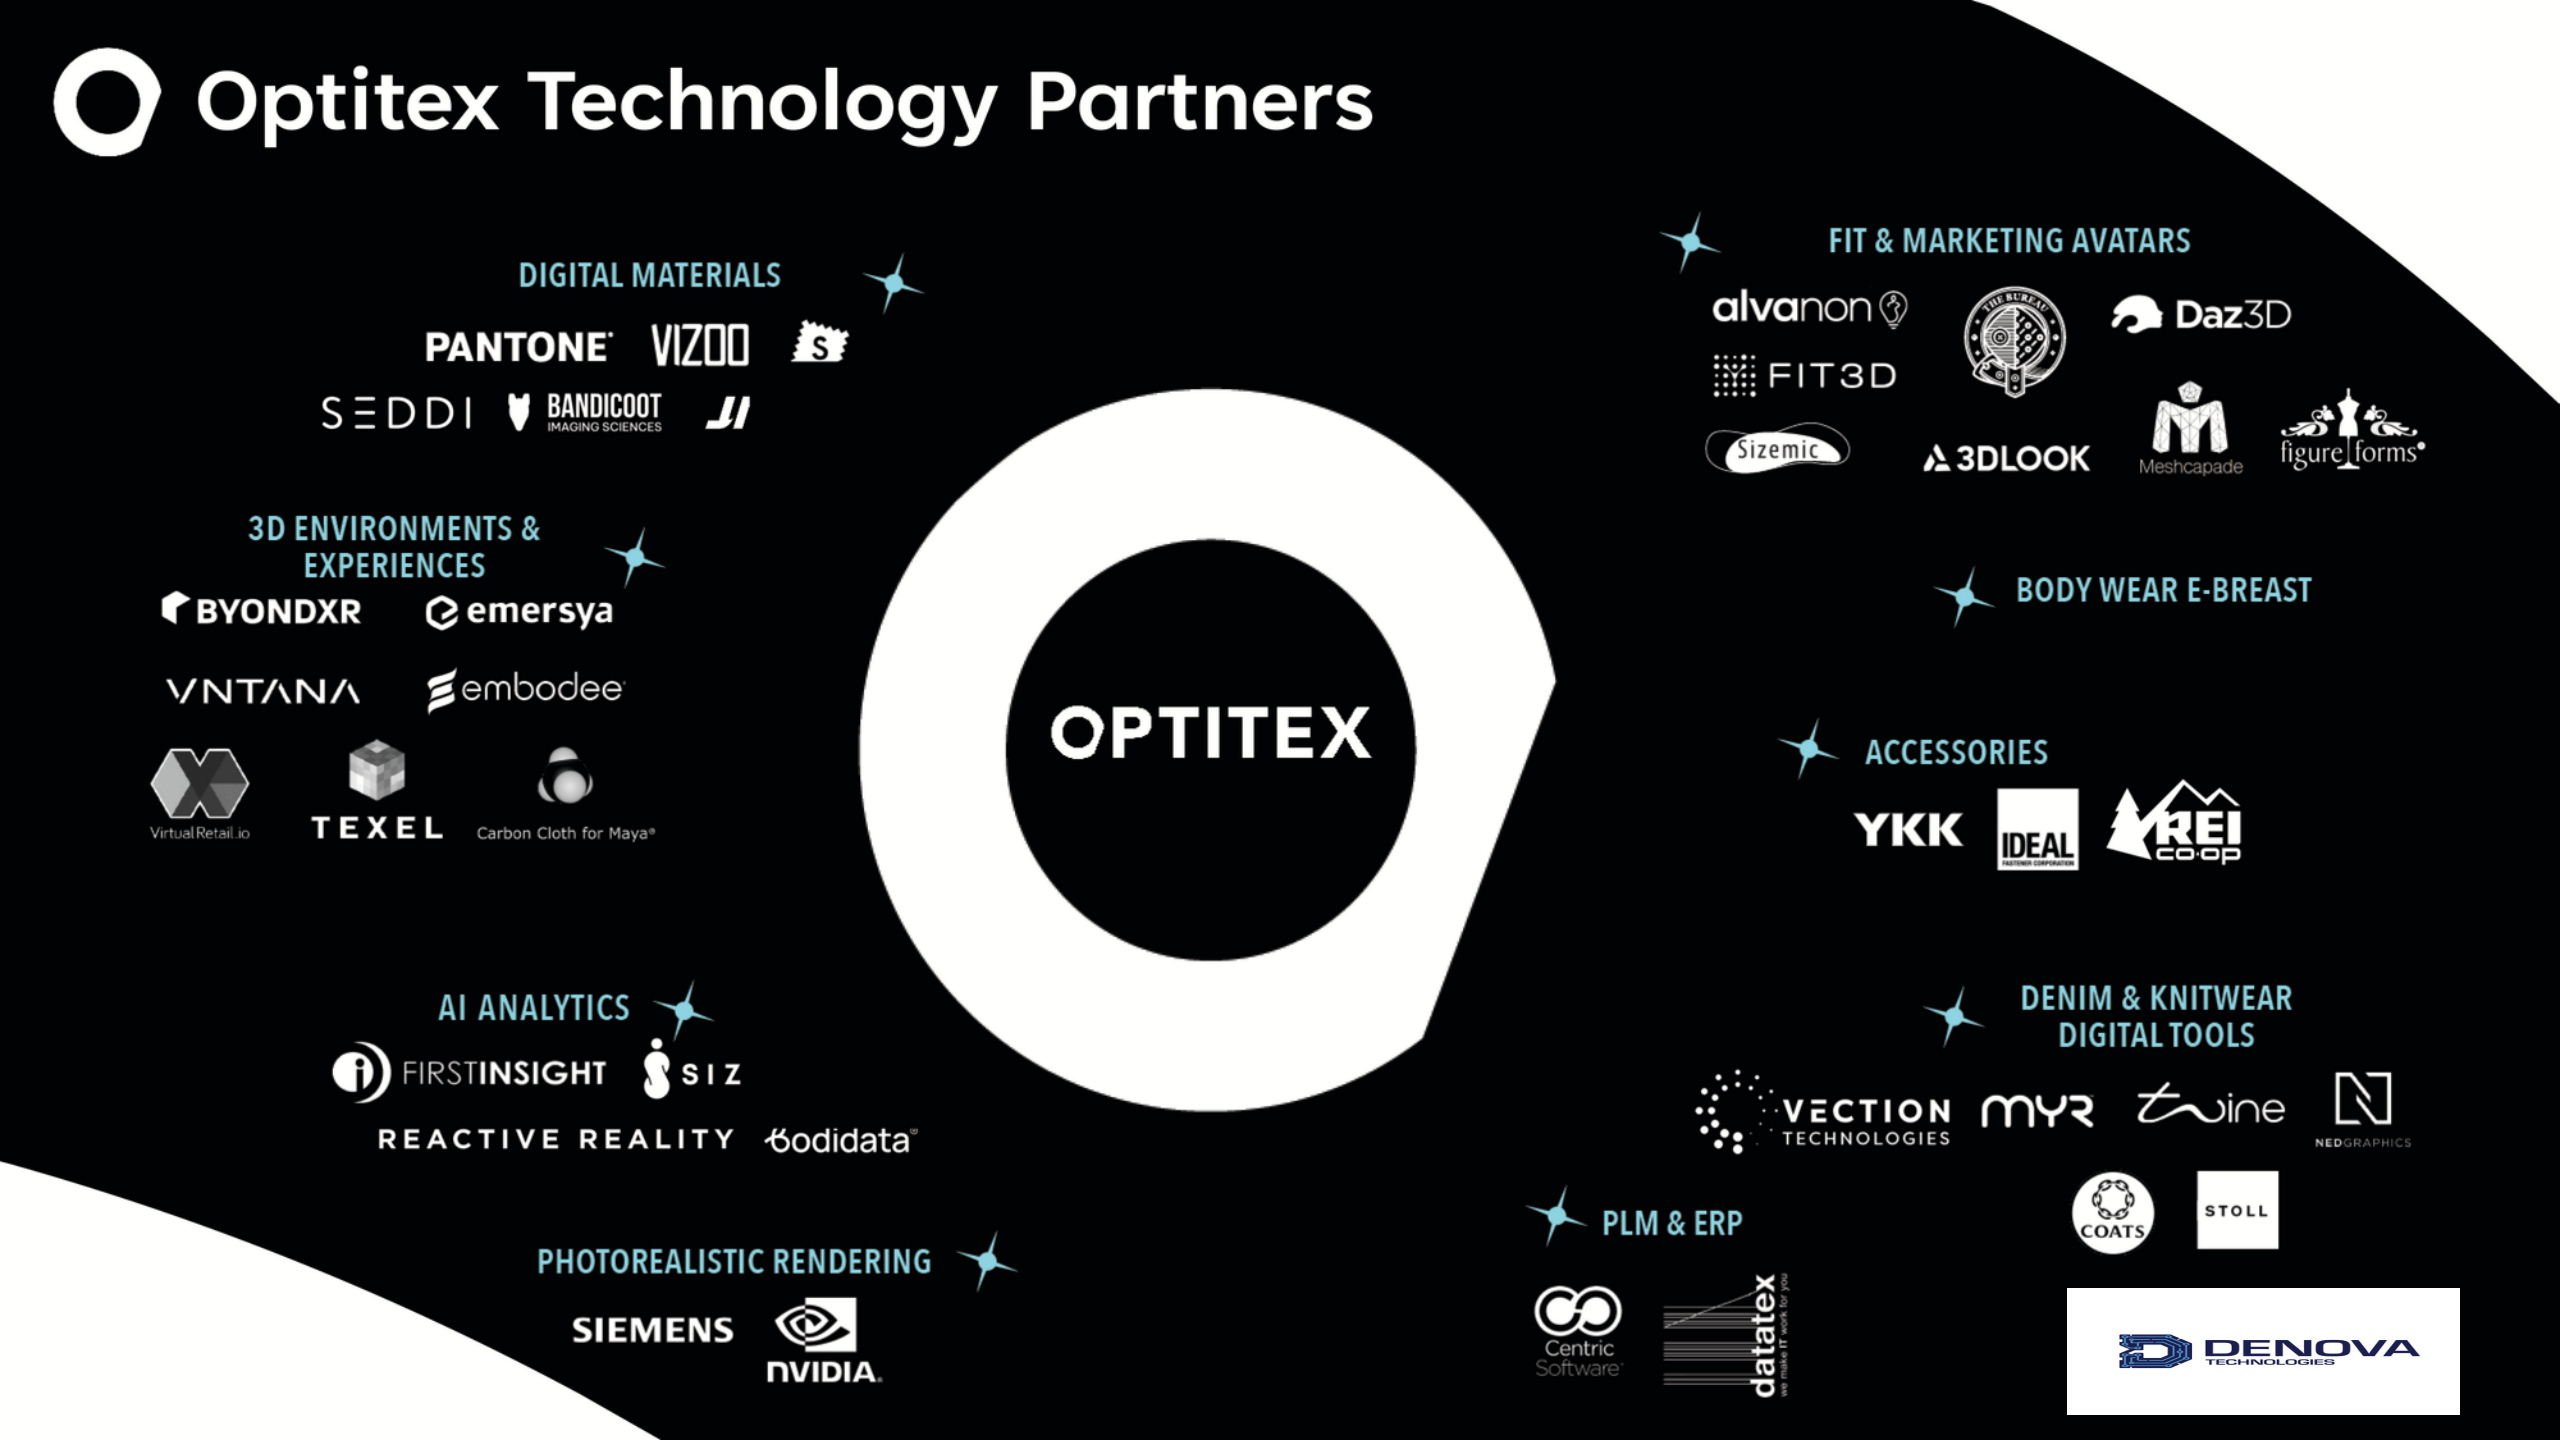

Spreading Plies														
Marker 1	D:\Customer D	Sizes								Fabric Length,m	Fabric Weight,kg	Efficiency,%	Cut Length,m	Marker Length,cm	Material Cost,$
Colors	Plies number	42-XS	46-S	50-M	54-L	58-XL	62-XXL	66-3XL	4XL						
NAVY	3993		3993	11979	15972	7986	3993			35494.97	8655.09	82.77	88.35	888.93

ROLL MANAGEMENT - Use the optional add-on Roll Management module to integrate stock room data into your cut room order.

- Automatically assign individual rolls of different widths to specific markers, taking into account shrinkage and shading
- Optimize fabric inventory utilization in line with priorities, such as old stock, minimum wastage, and more
- Ensure your cut order is synchronized with current fabric stocks
